Business Intelligence Technologies

Business Intelligence Technologies (BIT) delivers innovative, intelligent analytical apps and solutions to industries that process large volume data. Our solutions extend from modernisation of legacy systems, apps for analytics and reporting to training. We deliver value to our customers by leveraging the power of Big Data, Cloud, Mobile and Social Media tools. We have extensive experience and capabilities for delivering cross border payment solutions, Patient Management Solutions and ChatBots for cross-industry.

Our team of subject matter specialists, developers with extensive experience in delivering software products and services and helping our clients in optimising their end-to-end delivery process. Whether it's solving domain-specific problems, developing an AI capability or implementing a stand-alone product, we do it in an iterative way, blending agile processes with strong engineering practices.
