PI.EXCHANGE

Established in early 2017, PI.EXCHANGE is a deep-tech company specialised in the development of Artificial Intelligent/Machine Learning (AI/ML) platforms and applications. We are a tier-1 team of world-class scientists, engineers & business professionals with the combined knowledge & experience in Fortune 500 entities and a solid commitment to **make AI accessible to every businesses, big or small.**

Our AI & Analytics Engine is an **AI-powered full-service AI/ML application development & automation platform.** It enables your AI/ML applications to be rapidly and easily built in a security & privacy by design environment. The Engine is uniquely capable of automatically predicting what models are best for your data and the potential costs you have to commit. With our simple-to-use and cost-effective Engine, your business can be AI-ready and data-driven with the AI capabilities that currently only exist in tech-giants. It helps your business understand customers better, improve ROI and inform your decision-making processes through rapid prediction and insight extraction. We differentiate ourselves through **high performance, affordability** and **super user experience.**
