Plattar

Plattar's 3D & AR visualisation platform for the web offers a single solution to create, manage and deploy your 3D content for visualisation and Augmented Reality.

With our browser-based Augmented Reality - allow your customers to virtually try out your product in their environment with one click from your website on any mobile device, no app needed.

We make AR accessible to all organisations, without the need for traditional large upfront development fees and hidden costs once the solution has been built.
