Leash It

Leash It is a unique next generation Bluetooth real time asset and people tracking solution. Leash It is easily retro-fitted into any infrastructure and will give businesses from SMEs and enterprise to Governments an immediate ROI by improving productivity and efficiencies of both assets and staff. With the ability to add in sensors for temperature and humidity within the building and refrigerators and offering duress alarms, Leash It's dashboard is an end-to-end solution to improve every business's bottom line.

With analytical data collected by the solution every 10 seconds, it supplies administrators an abundance of information that helps improve processes and mitigate risk. The solution's built-in analytical engine will turn that data into easy to read graphs and diagrams. With real time anomaly notifications via SMS and email, rules can be created to protect every aspect of your business. If you love it, Leash It!
