OMC International

OMC International is an Australian based maritime engineering company delivering multi award winning digital port solutions and e-Navigation technologies globally.

The industry leading Dynamic Under Keel Clearance System (DUKC®) has safely facilitated 170,000+ transits for ports worldwide. DUKC® enables ports to accommodate larger, deeper vessels, reduce capital and maintenance dredging requirements, and optimise shipping operations.

OMC's suite of digital port solutions also includes:

- Dynamic Port Capacity Model (DPCM®)
- Dynamic Moored Vessel Analysis
- Dynamic Manoeuvring Analysis
- BerthAlert moored vessel safety system
- PortWeather environmental data management and display dashboard
- Real-time ship motion analysis, and
- Dredge optimisation
