Whispir

Whispir is a cutting-edge software platform that enables organisations to deliver actionable two-way interactions at scale using automated multi-channel communications workflows.

Create quality templates for email, mobile web, social channels and more in minutes with our drag and drop template builder and over 60 individual components from images to maps. Easily integrate with existing IT systems, significantly reducing barriers to adoption and enabling customer implementation within days.

The need for Whispir's platform is universal with customers in almost every industry vertical, from banking and finance to education, retail, healthcare, government, and emergency communications providers. The platform currently produces 1.5 billion interactions between 630+ blue chip customers and their 55 million unique stakeholders each year.
