LeashView

LeashView is an asset and staff tracking, contract tracing and sensor monitoring SaaS platform and mobile app that is cost-effective, easy to use and implement, hardware agnostic, customisable, can be retrofitted into any premises (indoors or outdoors) and can be embedded into any workflow management platforms.

LeashView substantially improves employee safety, productivity, customer experience, patient and aged care while giving administrators real time oversight to manage and mitigate OH&S, misplacement or theft risk.
